

Ralston Avenue Corridor Improvements Project – Segment 1 Q & A's

Date: May 25, 2016

Question 1:

Based on the preliminary plans from the previous consultant's drawings, there is striping work east of the 101 freeway. Is this portion included?

Answer:

Yes, this portion is included as shown on the newest available plans. Please contact Brian Dong bdong@belmont.gov AND Bozhena Palatnik bpalatnik@belmont.gov for a copy of the plans.

Question 2:

According to the Ralston Avenue Corridor Study and although the Request for Proposal (RFP) calls for Segment 1, the project seems to include Segment 2 as well. Is Segment 2 also part of the project?

Answer:

Yes. Although the name says Segment 1, Segment 2 of the Corridor study is part of this project.

Question 3:

There are several ADA ramps that would need to be reconstructed to meet current standards. Should the proposal include these ramps?

Answer:

Yes

Question 4:

Should the proposal look into widening the sidewalks and removing/changing parking between El Camino Real and Twin Pines Road on Ralston Avenue?

Answer:

Parking in this area is coveted by businesses. However, changes to the area should not be ruled out if there is an effective design that requires it. It is also not explicitly required that they be removed.

Question 5:

Is there an approximate time of when we will know whether the Signalization of South Road and Ralston Avenue will be officially included as part of the project?

Answer:

We should know by sometime in August 2016.
